Xerox Positioned in the "Leaders" Quadrant in Research Firm's Printer Report

NORWALK, Conn., Dec. 16, 2008 – Xerox Corporation (NYSE: XRX) has been positioned by Gartner, Inc., in the Leaders Quadrant in the "[Magic Quadrant for MFPs and Printers¹](#)" report.

The Magic Quadrant is a proprietary research tool developed by Gartner to evaluate companies on completeness of vision and ability to execute.

According to the report, "Leaders are the most capable in providing MFPs, printers and the associated printing solutions and services that support the proper functioning of these devices in the broadest category of customer sites. Leaders have broad channel capability to deliver the products to customers where they want to procure them. Leaders consistently hold strong market share positions in both printers and MFPs worldwide and are capable of delivering nearly identical service levels in more of the regions where Gartner customers are located. Leaders tend to have the deepest global capability and the inventiveness and resources, skills and vision to deliver superior levels of support to existing and future customers globally. Leaders have a proven track record of channeling research and development initiatives into products and solutions that customers need."

Gartner included print technology providers who sell, service, and support and provide printing and document solutions.

"In my opinion, these results demonstrate our ability to provide innovative products, services and solutions to meet the needs of businesses small to large," said Rick Dastin, president, Xerox Office Group. "Xerox will continue setting the highest standards in the industry for helping customers improve their work processes and business results."

Stewart Business Systems and Xerox provides the document industry's broadest portfolio of offerings. It includes color and black-and-white desktop printers, office multifunction systems and services to help customers meet their printing needs.

In September, Gartner also positioned Xerox in the Leaders Quadrant in the "Magic Quadrant for Managed Print Services Worldwide²" report.
